About College Board

College Board reaches more than 7 million students a year, helping them navigate the path from high school to college and career. Our not-for-profit membership organization was founded more than 120 years ago. We pioneered programs like the SAT® and AP® to expand opportunities for students and help them develop the skills they need. Our BigFuture® program helps students plan for college, pay for college, and explore careers. Learn more at [cb.org](https://collegeboard.org).

Test-Taking Information

How Can the SAT Serve You?

When surveyed, more than 80% of students say they want the option to submit test scores to colleges and universities. Most colleges and universities, including those that are test optional, continue to value SAT® scores as one part of the admissions process. By taking the SAT, you can apply to universities in the United States and around the world. Taking the SAT is also a great way to find out how prepared you are for college, career, or whatever your path after high school is. Many students find that their test scores confirm their high school grades or can even show their strengths beyond what their grades show. Learn more at sat.org/whytake.

What to Expect from this Guide

This *SAT Weekend Student Guide* includes everything you need to know before, during, and after test day, such as:

- An introduction to the Bluebook™ testing application.
- Registration and accommodation information, as well as resources and policies.
- How to practice and prepare for the test.
- Details about how the test is structured.
- Lists for test day items and testing guidelines.
- How to understand and use your scores.

You will be required to review and agree to the SAT Weekend Testing Rules during registration for the test and in Bluebook before you can take the test. You should review them ahead of time. They are available at sat.org/rules.

How the SAT Is Organized

The SAT measures the knowledge and skills that you are learning in school and that matter most for college and career readiness. There are 2 sections of the SAT—(1) Reading and Writing and (2) Math. The SAT is scored on a 400–1600 point scale. The SAT takes about 2 hours and 14 minutes to complete.

The SAT, and all tests in the SAT Suite of Assessments, uses multistage adaptive testing. Each test section (Reading and Writing, Math) is divided into two equal-length, separately timed parts, called modules. You answer a set of questions in the first module before moving on to the next. The questions that you are given in the second module depend on how you performed on the first module.

This type of adaptive testing allows for a much shorter, but just as reliable, assessment that delivers accurate scores more efficiently.

The test breaks down like this:

TEST ORGANIZATION		
Section	Time Allotted (min.)	Number of Questions
Reading and Writing	64	54
Math	70	44

The SAT follows the same timing as all other tests in the SAT Suite.

You must complete all sections of the test. If you leave before dismissal, your test may be considered incomplete or may be subject to cancellation. Do not close your laptop lid or cover or turn off your tablet screen at any point until you are dismissed. If you are approved for extended time, see *If You Need Testing Accommodations* on page 4 for more information.

Bluebook Digital Testing

Bluebook is the custom-built application you'll use to take the SAT. This app has many features that you'll find useful, including a test preview that can help you familiarize yourself with key aspects of the app before the test. Visit bluebook.app.collegeboard.org to download the app and for installation instructions.

Bluebook Tools

Bluebook includes plenty of test tools. Here are some examples:

- **Mark for review:** You can flag and return to any question within a given test module that you want to come back to later.
- **Testing timer:** A clock counts down the time remaining in each module. You can hide the timer, and you get an alert when 5 minutes remain in the module. When there are only 5 minutes remaining, the clock can no longer be hidden.
- **Calculator:** A built-in Desmos calculator is available for the entire Math section. You can toggle between the scientific and graphing Desmos calculators at any point during the Math section. The calculator is provided in the Bluebook practice test to allow you to practice with it before the test. (You can also bring your own acceptable calculator; please see [SAT Calculator Policy](#) for more information.)
- **Line reader:** Use this tool to focus as you read test content.
- **Reference sheet:** In the Math section, you have access to a list of common formulas.
- **Highlights & Notes:** On non-math questions, you can highlight any part of a passage and leave yourself a note. You can change the highlight color, add an underline, make a note, or delete the highlight. A Windows tablet must have an external keyboard in order for students to use the Highlights & Notes tool in Bluebook.
- **Option eliminator:** If you think an answer option is wrong, you can cross it out.
- **Question menu:** Students can see which questions they skipped or marked for review and navigate to any question in the module.

You can use keyboard shortcuts on laptops or pinch and zoom on tablets to get a closer look at any part of the question, and you can set up your device before testing to use color contrast.

Testing Devices

You can take the SAT on certain devices. Your testing device must meet College Board requirements. A list of approved testing devices and requirements may be found at bluebook.collegeboard.org/technology/devices/requirements and bluebook.collegeboard.org/students/approved-devices. Testing device and system requirements are subject to change without prior notice to you, and College Board retains sole discretion to block or disable access to Bluebook for reasons of test security. You cannot test on a mobile phone.

IMPORTANT: Download the exam app onto your device before test day. If you are taking the test on a device managed by your school, ask your school's technology department to install the app and ensure your device is configured with the most up-to-date required Bluebook settings. For more information on preparing your testing device, visit bluebook.org/device-prep.

Your device must also be able to connect to Wi-Fi, especially Wi-Fi beyond your home and school, and be charged enough to stay on for roughly three hours. You must connect to your testing site's Wi-Fi in order to test. We recommend you bring a power cord or portable charger, but we can't guarantee you'll have access to an outlet.

You are permitted to bring an external mouse for your device and an external keyboard if your device is a tablet. For Windows tablets, external keyboards are required if you want to use the Highlights & Notes tool. You can't bring detachable device privacy screens. All other applications and programs must be closed during the test, including writing assistants. You can't test on multiple devices.

If you don't have access to a device, you can request to borrow one from College Board. You may qualify to borrow a testing device from College Board if you submit a request on **My SAT** before the deadline. You must register and complete the device request at least 30 days before the test date. Bluebook will be preinstalled on these loaned devices.

If you participate in the device lending program, you'll arrive at the test center 30 minutes early in order to receive your borrowed device, complete exam setup, and finish the check-in process. See *If You Need to Borrow a Device* on page 6 for more information.

IMPORTANT: It's critical that Bluebook is downloaded in advance and that you check in on the device you'll test with. If you use a different device on test day, you will need to complete the check-in process again.

Digital Testing Disruptions

An internet connection is required to start the test, but Bluebook will keep running even if your connection drops momentarily. If your device battery runs down, you can simply plug in, restart your device, and pick up where you left off—all your work will be saved, and you won't lose testing time. At the end of the test, if you're still offline and your answer submission fails, you'll have until 11:59 p.m. local time the next day to get back online and submit your answers. If your answer submission fails on a device borrowed from College Board, don't leave the test center until it submits successfully (you or your test coordinator can call Customer Service).

If the app crashes during your exam, just relaunch it and hit **Resume Testing**. Raise your hand so the proctor can approve your re-entry, and you'll return to the question you were on. The testing timer will be paused until you resume testing.

Before Test Day

To take the SAT, you need to:

- Register for the test on [My SAT](#).
- Ensure you have an acceptable device to test on.
- Become familiar with Bluebook before test day. See more under Prepare for the SAT on page 11.
- Complete exam setup in Bluebook before test day (or immediately after receiving a borrowed device).

Use the information in this section to register for the test, learn about accommodations, and prepare to test with Bluebook.

Registering and Exam Setup for the Test

Register online for the SAT at [My SAT](#) by signing in with your free College Board account. If you don't have an account yet, create one. At least five days before you test, you'll need to [upload a photo](#) of yourself to your registration in My SAT. This photo will be used to identify you on test day. Once you're registered to take the test, you'll see a test card in Bluebook five days before your test date. If it's within five days of your test, and it's not showing up in the app, please contact Customer Service.

Within the five days before you test, you'll log in to Bluebook to complete a quick exam setup as just described. This step must be completed to check in for testing. You'll watch a short video, then you'll be asked to confirm your information, read and agree to the SAT Weekend Testing Rules, and complete a device check. At the end of exam setup, the app generates your admission ticket. You can take a picture of the ticket, email the ticket to yourself, or print it to present to testing staff for admission to the test center. You must complete exam setup before test day to confirm your device supports the app and to generate your admission ticket for test day check-in. If you don't follow these steps prior to test day, you may be turned away.

Waitlist

Students residing in the U.S. and U.S. territories (except the U.S. Virgin Islands, Northern Mariana Islands, or U.S. minor outlying islands) have the opportunity to join the waitlist if they cannot find a preferable test center nearby. This feature helps you secure a seat within a customized distance as seats become available. During SAT registration, the option to join the waitlist will appear on the same screen as test center search if you can't find an available test center within your initial set radius or when you redo your test center search. You must preregister and pay for the test registration to join the waitlist, but there is no additional fee to join. For more information, see the [Waitlist](#) webpage.

If You Need Testing Accommodations

If you have a disability that requires accommodations such as a screen reader, extra breaks, or permission to test blood sugar, be sure to have your school request College Board approval at least seven weeks before the test date you need the accommodations for. Requests for accommodations are handled by the College Board Services for Students with Disabilities (SSD) office. For more information about requesting accommodations and timing, visit our [Accommodations on College Board Exams](#) webpage.

Most students with accommodations test digitally, and many accommodations are provided right in Bluebook. For example, if you're approved for extended time, you'll receive a digital exam enabled with your approved amount of extended time per section. If you need large print, you can use zoom. If you need assistance with reading, you might be approved for Text-to-Speech (Embedded) or Screen Reader (Non-Embedded).

Check your accommodations in the [Accommodations & Supports Dashboard](#) before testing to ensure you know which accommodations you've been approved for. Some accommodations may be administered differently on the SAT than in the classroom. Speak to your SSD coordinator if your approved accommodations don't match your needs. Visit the [Using Accommodations](#) webpage for more information about digital accommodations.

When considering accommodations, note the following:

- The quickest and most efficient way to request accommodations is to work with your school. Your SSD coordinator, counselor, or other appropriate school staff can help determine the most suitable accommodations for you and submit a request online.
- Talk to your SSD coordinator to confirm what accommodations you're approved for and any additional information you need for testing.
- If you are homeschooled or want to request accommodations without your school, download and submit a Student Eligibility Form from the [Requesting Without Going Through the School](#) webpage.
- Once approved for accommodations, with some exceptions, you remain approved and do not have to apply again when taking another College Board test.
- If you move to a new school after you've been approved for accommodations, inform your new school of your accommodations and provide them with your SSD number, if you have it.
- The [Accommodations & Supports Dashboard](#) is a student portal where you can see your decision letters and approved accommodations. Make sure that your school's SSD coordinator has your email address so that you'll be able to access the dashboard easily.
- For students approved for extended time, text-to-speech, or screen reader:
 - ◆ If you're approved for extended time, text-to-speech, or screen reader for math only, you'll only get those accommodations for the Math section; but if you're approved for any of those accommodations for reading, you'll get them for the whole test.
 - ◆ If you are approved for text-to-speech (embedded in Bluebook, with no configuration needed) or screen reader (non-embedded), be sure to practice with your accommodation ahead of test day to ensure you understand how it will work with the digital test.
 - ◆ If you're approved for extended time, once the standard time has elapsed for a module, you can move on when you're ready rather than having to wait until your approved time is up. We encourage you to use your full allotted time and you should only move ahead if you have completed the module. As always, at the end of the test, wait until testing staff have confirmed that your test has been submitted before closing the lid to your laptop, turning off your tablet screen, closing Bluebook, or shutting down your device. Please visit [Extended Time](#) for more information.

IMPORTANT: Starting in fall 2026, the Text-to-Speech (Embedded) accommodation will be center based and administered in test centers. You'll be required to bring your own wired, non-Bluetooth, non-recording headphones with you on test day to ensure you're able to test.

The SAT is accessible to students approved to use assistive technology, including a screen reader and text-to-speech. If you are approved for text-to-speech (embedded), you'll use the tool built into Bluebook. No setup is needed. If you are approved for a screen reader, you'll use your own assistive technology software or the software built into the operating system on your testing device. For screen readers or other assistive technology, you'll need to open and start the assistive technology device or software before you open Bluebook for practice and for testing. On test day, adjust any necessary settings before you begin check-in for the digital test. Visit our [Accommodations and Assistive Technology](#) webpage for detailed information about using assistive technology with Bluebook. Bluebook also includes guidance on setup, navigation, and tools to help you access test content.

IMPORTANT: Practice taking a digital test with the technology you plan to use to test. Please see Prepare for the SAT on page 11 for more information about practice.

Fee Waiver Benefits for Income-Eligible Students

Students who face financial barriers to taking the SAT may be eligible for SAT fee waivers. Visit sat.org/feewaivers to learn whether you're eligible and how to confirm your eligibility with College Board. College Board offers fee waivers to eligible students in the U.S. or U.S. territories. Students attending school outside the country must also be U.S. citizens to be eligible for fee waivers. If you submit false information to College Board to obtain a fee waiver fraudulently, your score will be canceled, and you may be barred from taking future tests.

For each qualifying student, one fee waiver unlocks a suite of benefits, which includes two free SAT test registrations and unlimited score sends to colleges, universities, and scholarship programs. Seniors with fee waiver benefits automatically receive waived application fees at participating colleges and universities. SAT fee waivers also give first-time U.S. college and university applicants fee waivers for applying for nonfederal financial aid using CSS Profile®. Learn more at profileonline.collegeboard.org.

You can learn about how to get fee waiver benefits, eligibility, and the other benefits offered to help you in the college application process at sat.org/feewaivers.

If you think you're eligible, talk to your school counselor about getting a fee waiver code. You can also request a fee waiver directly from College Board through your [College Board account](#). If you request a fee waiver from College Board, please confirm your eligibility and then aim to submit your request as early as possible and at least 1–2 weeks before the registration deadline. Please note, you may only receive one set of fee waiver benefits per lifetime. Your fee waiver status may be shared with your school and district.

IMPORTANT: Don't forget the Free Application for Federal Student Aid (FAFSA®)—the form you'll need to qualify for most financial aid opportunities—can be filed beginning July 1. You should complete your FAFSA as early as possible.

If You Need to Borrow a Device

Students who do not have access to a device can request to borrow one from College Board. You may qualify to borrow a testing device if you submit a request at least 30 days before the test date. If so, additional rules relating to borrowing a testing device will apply to you as shown in the terms of the Testing Device Lending Agreement.

We may be able to loan a testing device for use on test day, based on availability. This device would be free of charge. You'll pick up the loaned testing device at the test center before the SAT and return it to testing staff in the same condition as you received it as soon as you complete the test and your answers are submitted. You can't take the device off the test site or use it for any other purpose than to take the SAT.

Submitting a request does not guarantee that College Board will loan you a testing device. Test centers cannot provide you with a testing device from College Board on test day unless your request made for that test date was approved by College Board. If you show up on test day without a device, and you have not gone through the process of requesting and being approved to borrow one from us, you'll be dismissed. If you are approved to borrow a testing device, we will make all reasonable efforts to provide you with such a device on test day. However, we cannot guarantee that a testing device will be available on test day.

If you borrow a testing device, you agree to comply with the terms of the Testing Device Lending Agreement in addition to the SAT Weekend Testing Rules. You'll need to complete exam setup before checking in to your testing room.

Optional Questions to Answer When You Register

When you register for the SAT, you'll have the opportunity to answer questions about yourself, your educational experience, and your plans for after you graduate high school.

Your responses give your school counselors and college admissions officers, as applicable, information they can use to help you plan your future. These questions are completely optional, and you don't have to answer them. However, the more information you provide, the more they may be able to help you. If your parent or guardian has told you that you shouldn't provide any optional or voluntary information, you shouldn't do so.

Your answers will be used by College Board as described in its Privacy Statement at privacy.collegeboard.org/privacy-statement, including for educational research. Your responses will also be provided to your school, district, and state department of education. If you choose to participate in Student Search Service™, your answers will be provided to participating education organizations, as described in the Student Search Service section below. Your answers may also be provided to colleges, universities, and scholarship programs to which you choose to send your scores. See the SAT Weekend Testing Rules at sat.org/rules.

Your responses, when combined with those of all other students taking the SAT, contribute to an understanding of the academic preparation, extra- and cocurricular involvement, and post-high-school plans of your graduating class. This information can help College Board, colleges, and universities deliver programs and opportunities to serve you and your classmates.

Useful Resources

We offer free resources through BigFuture® to help you plan the right next step after high school. Discover future career options based on your interests, explore colleges across the country, and learn about scholarships, financial aid, and more. Visit bigfuture.org.

Student Search Service

Student Search Service is a free, voluntary program that connects students with information about opportunities from nearly 1,200 eligible colleges, universities, scholarships, and government agencies running education programs. By joining Student Search Service, you can connect with colleges and scholarship programs looking for students like you and discover opportunities you had not previously considered.

Key facts about Student Search Service:

- You can join for free and hear from a diverse group of nonprofit accredited colleges and universities (domestic and international), nonprofit scholarship providers, and government agencies administering educational programs ("Education Organizations"). No other organizations or companies are eligible to participate in Student Search Service.
- When you take a College Board test, you'll be asked to provide certain information about yourself by answering optional questions about yourself during registration.
- You'll have the opportunity to join Student Search Service as part of registration. It's entirely up to you whether to opt in. The service is free to you, but Education Organizations may pay us a licensing fee to use the service. We use those fees to support our nonprofit, mission-driven work, including providing fee waivers so that students from lower income families can take the SAT for free. College Board is a nonprofit organization.
- Being part of Student Search Service is voluntary and you can opt out at any time.
- Being contacted by an Education Organization doesn't mean you've been admitted or received a scholarship. You must submit the required information and complete steps requested by the Education Organization for potential admission, enrollment, scholarship and/or financial aid.

How Student Search Service Works

- If you opt in, you may be identified by Education Organizations as a potential match for their programs and opportunities.
- Education Organizations generally look for groups of students based on expected graduation date, where they live, self-reported cumulative grade point average (GPA), test score ranges, intended college major, geography, and other limited parameters. This information may be provided by you to College Board, such as during test registration, testing, and when using the College Board's college planning website, bigfuture.org.
- College Board never shares your actual test scores, grades, disability status, parent information (unless they separately opt in to Student Search Service), or telephone numbers. Please note, we do share test score ranges and GPA. For details on the information shared, please see bigfuture.collegeboard.org/student-search-service/what-information-shared. If you opt in to Student Search Service, we may share information that you provided prior to and after opting in to Student Search Service, but we will not share any information until you opt in.
- If you have opted in and match the Education Organizations' search criteria, we will provide them with your contact information so they can reach out to you by postal mail (if you provided your address) and/or email about their programs and opportunities. They have to keep your data secure and may not share your data with any third parties (other than service providers to the Education Organizations).
- Education Organizations send students information about things like:
 - ◆ Financial aid, scholarships, or other ways to make college or university more affordable
 - ◆ Details on campus life and student services
 - ◆ Overviews of majors, courses, and degree options
 - ◆ Deadline information
 - ◆ Direct admission offers from colleges
- For more information, visit bigfuture.collegeboard.org/student-search-service.

Opting Out of Student Search Service

If at any time you change your mind and want to stop participating, please visit my.collegeboard.org/profile/privacy, complete the Your Privacy Choices webform at form.collegeboard.org/f/data-subject-rights-request, or contact us at SearchCustomerService@collegeboard.org or 866-630-9305. Please note, Education Organizations that have already received your name and other data may continue to send you information. You may contact such organizations directly to opt out of further communications from them.

Connect to Opportunities in Higher Education

Each year millions of students take the SAT, and thousands of high school counselors and postsecondary admission officers worldwide use their scores to guide decisions in the college application process. The test that you'll take on test day is a challenging and fair assessment of what you know and can do. The questions you'll tackle focus on the knowledge and skills that the best available evidence indicates are essential for college and career readiness and success.

We're committed to providing opportunities to help you reach your goals for college and career. Students who are the first in their families to consider attending college, who come from low-income families, or come from a background that does not broadly participate in college may feel that college isn't for them. Our mission is to help all students recognize and make the most of the opportunities they've earned.

Privacy Policies

College Board recognizes the importance of protecting your privacy. Please review our privacy policies at collegeboard.org/privacy-center ("Privacy Policies") and the SAT Weekend Testing Rules at sat.org/rules to understand our collection, use, and disclosure of your personally identifiable information.

Telemarketing Scams

We sometimes get reports of phone scams when callers posing as employees of College Board try to sell test preparation products or request sensitive, personally identifying information, such as credit card and Social Security numbers. College Board does not make unsolicited phone calls or send emails to students or families requesting this type of information. This type of activity, known as telemarketing fraud, is a crime and should be reported to the Federal Communications Commission (FCC). Please visit [Important Information About Telemarketing and Internet Scams](#) for more information.

Test Question Inquiries

If you find what you consider to be an error or an ambiguity in a test question, tell the test coordinator immediately after the test. You may also complete an online form to report a test error or ambiguity at satsuite.collegeboard.org/contact-us.

In your inquiry, provide your name and email address, the date you took the SAT, the name and address of the school where you took the test, the test section and module, the test question (as well as you can remember), and an explanation of your concern about the question.

College Board will send you a response after your inquiry has been reviewed thoroughly by subject-matter specialists. If you submit a report for what you consider to be an error or an ambiguity in a test question, you understand that College Board may need to hold your SAT score for review. As a result, your score may not be available by the published release date for your administration.

Makeup Testing

During bad weather, natural disasters, power outages, or other unusual conditions, test centers may be closed. Check sat.org/test-center-closings for test center closings on Friday night and Saturday morning before you go to the test center. Information about makeup testing is posted as it's available. If a makeup date has been confirmed, that information is included.

The following policies apply to makeup testing:

- The availability of makeup testing and the conditions that make test takers eligible to take a makeup test are at the sole discretion of College Board. The ability to offer a makeup test is based on test center availability.
- Test centers may close or make changes on short notice, including on test day, and they may even close for the scheduled makeup date.
- Access to scores from makeup administrations may be delayed by several weeks.

Additional Information for Students

A primary purpose of the SAT is to predict how prepared students are to succeed, both in college and in career training programs. College Board continues to conduct extensive research on the predictive validity of the SAT. Several recent validity studies examined digital SAT score relationships with other education measures such as high school GPA (HSGPA) and the relationship of SAT scores to university outcomes. These studies found that:

- SAT scores are strongly predictive of college performance, and this finding also holds for minority students, first-generation college students, and students whose best language was another language or English and another language.
- SAT scores meaningfully improve the prediction of college performance above HSGPA alone.
- Institutions using SAT scores can have confidence these scores will provide valuable insights for understanding students' readiness for college, course placement and major-field decisions, scholarship and honors program decisions, and identifying students who may need academic support.

SAT scores provide meaningful information about a student's likelihood of success in college and university, but the SAT should not be used as the sole source of information for high-stakes decisions. Find out more at sat.org.

Download a copy of the [Assessment Framework for the Digital SAT Suite](#) to learn more about the evidence-based design and development of the digital SAT Suite. A large-scale, national study evaluating the validity of digital SAT scores to predict college outcomes will be conducted once College Board has sufficient data from operational administrations of the test to support such analyses.

Procedures to Ensure Fairness and Access

College Board combats any bias in our tests with our review processes. Fairness reviewers help ensure that test materials are accessible to all students, have no offensive or insensitive content, and aren't made easier or harder by factors outside the subject being measured.

Prepare for the SAT

College Board offers many free, official ways to help you prepare for the SAT at sat.org/practice. Here are some of them:

Test Preview

To prepare for the SAT, you'll have access to a test preview within Bluebook. This tool helps you:

- Get familiar with functions in the app.
- See the structure of the test.
- Try a small sample of reading and writing and math questions to familiarize yourself with the kinds of questions you'll encounter on test day and with how to properly enter your answers.
- Try all the testing tools and experience how the digital tests work with any assistive technology you're approved to use.

Full-Length Adaptive SAT Practice Tests

Taking a full-length practice test for the SAT will let you experience digital testing and familiarize yourself with test content, including the types of questions you'll answer and the exam tools you'll use to take the test. If you'll be using a personal device for testing, you can also make sure your device supports the app and is ready to use on test day.

While taking practice tests in Bluebook, every student is welcome to toggle on and experiment with certain built-in accommodations (text-to-speech, screen readers, etc.). However, practicing with accommodations does not mean you are approved to take an actual assessment with those accommodations. See *If You Need Testing Accommodations* on page 4 to find out more.

Each SAT section—(1) Reading and Writing and (2) Math—is divided into two separately timed modules. Depending on how you answer the questions in the first module, you'll be routed to a second module, which has a different mix of difficulty levels. The mix of questions in the second module is, on average, either of higher difficulty or of lower difficulty than the mix in the first module. Taking a practice test in Bluebook helps you gain experience and comfort with the way you'll be assessed on test day.

The full-length practice tests will also give you a score.

NOTE: You can download Bluebook and start practicing anytime—you'll need a College Board account but you don't need to be registered for a test.

1. Download the Bluebook app at bluebook.collegeboard.org.
2. Go to **Practice and Prepare** on the Bluebook homepage and select **Full-Length Practice**.
3. After you've finished the practice test in Bluebook, go to **My Practice** at mypractice.collegeboard.org to view your score results and review your practice exam questions and their skill level, answers, and explanations.

Official SAT Prep on Khan Academy

The SAT course content on Khan Academy® includes videos, articles, and worked examples designed to help you understand and experience the SAT Suite. Visit khanacademy.org/digital-sat.

For more information on practice for the SAT, go to sat.org/practice.

Schoolhouse.world

Official SAT tutoring by [Schoolhouse.world](https://schoolhouse.world) offers free, virtual, small-group support to help you prepare for the SAT. Schoolhouse.world is a peer-to-peer tutoring platform founded by Khan Academy. Today, you can participate in SAT Bootcamps, which are structured, 4-week tutoring experiences led by trained peer tutors. These tutors are high school students and recent graduates who scored in the 95th percentile or above on the section they teach and completed a certification program. You can sign up for bootcamps in one or both SAT sections. In small groups of typically 5–10 learners, students engage with official SAT practice content from College Board to strengthen test-taking skills, build confidence, and get ready for test day. Sign up for upcoming SAT bootcamps at schoolhouse.world/sat-bootcamp.

Student Question Bank

You can use the Student Question Bank to design your own practice. The question bank has thousands of official practice questions and you can filter by assessment, section (Reading and Writing or Math), domain, skill, and difficulty level. Go to **My Practice** at mypractice.collegeboard.org to access the **Student Question Bank**.

Additional Practice

You can also try targeted practice questions in My Practice. If you click the **Practice Specific Questions** link, My Practice gathers a tailored set of questions from our Student Question Bank based on your performance on a practice test. These questions are specifically designed to help you build your skills at a level that's right for you.

Question of the Day

The Question of the Day web app is a fun and fast way to check your knowledge. Each day, you can choose to answer a Reading and Writing question or a Math question. The content comes from the makers of the SAT Suite of Assessments, so you can answer official questions in a casual setting, earn badges, and build your streak. For more information, visit qotd.collegeboard.org.

Paper-Based Practice Tests

College Board provides downloadable paper versions of practice tests for those students who need to test with paper-based accommodations on test day. Since the PDF versions of our practice tests are nonadaptive, they're recommended only for students who will test with paper-based accommodations on test day. Using these practice materials does not mean you've been approved to test with a particular accommodation. These paper versions of the tests are longer and require more questions to assess your knowledge and skills. To practice on paper, you'll need to print these downloadable versions of the practice test at sat.org/paper-practice.

The Official SAT Study Guide

For additional tips on using practice tests effectively, check out the updated version of **The Official SAT Study Guide™** from the College Board bookstore or wherever you find test prep materials. You can also purchase the study guide when you register to take the SAT. While you can take practice tests for free in Bluebook, taking a printed practice test in the study guide is another strategy to help you build your endurance and strengthen your understanding of the questions on the test.

What the Reading and Writing Section Is Like

The Reading and Writing section of the SAT is designed to measure your success with building critical college and career readiness in literacy. In this section, you'll answer multiple-choice questions requiring you to read, comprehend, and use information and ideas in texts; analyze the craft and structure of texts; revise texts to improve the rhetorical expression of ideas; and edit texts to follow core conventions of Standard English.

Passages in this section, which serve as the basis for answering test questions, represent the subject areas of literature, history/social studies, the humanities, and science. There is a single question per passage.

Select questions in this section are accompanied by an informational graphic.

Reading and Writing Section Overview

Test length:

- 1st module: 25 operational questions and 2 pretest questions
- 2nd module: 25 operational questions and 2 pretest questions

Total: 54 questions

Time per module:

- 1st module: 32 minutes
- 2nd module: 32 minutes

Total: 64 minutes (1.19 minutes per question)

Questions from all four content domains appear in each test module. To help you budget your time, questions that test similar skills and knowledge are grouped together in Bluebook and then arranged from easiest to hardest. Pretest questions don't count toward your score.

READING AND WRITING SECTION CONTENT DOMAINS AND QUESTION DISTRIBUTION

Content Domain	Domain Description	Skill/Knowledge Testing Points	Question Distribution
Craft and Structure	Measures the comprehension, vocabulary, analysis, synthesis, and reasoning skills and knowledge needed to understand and use high-utility words and phrases in context, evaluate texts rhetorically, and make connections between topically related texts	Words in Context; Text Structure and Purpose; Cross-Text Connections	13–15 questions
Information and Ideas	Measures comprehension, analysis, and reasoning skills and knowledge and the ability to locate, interpret, evaluate, and integrate information and ideas from texts and informational graphics (tables, bar graphs, and line graphs)	Central Ideas and Details; Command of Evidence (Textual, Quantitative); Inferences	12–14 questions
Standard English Conventions	Measures the ability to edit texts to conform to core conventions of Standard English sentence structure, usage, and punctuation	Boundaries; Form, Structure, and Sense	11–15 questions
Expression of Ideas	Measures the ability to revise texts to improve the effectiveness of written expression and to meet specific rhetorical goals	Rhetorical Synthesis; Transitions	8–12 questions

These specifications are for the adaptive version of the digital test, which most students will take. Students approved for certain testing accommodations—such as a human reader, raised line drawings, or paper test forms—will test using a nonadaptive version of the digital SAT. This nonadaptive version has a slightly higher number of test questions in each module to account for the fact that the test is not adaptive. Practice for this nonadaptive version of the test is also available in Bluebook. You can learn more about nonadaptive test specifications in Appendix E of the [Assessment Framework for the Digital SAT Suite](#).

What the Math Section Is Like

The Math section of the SAT is designed to measure your success with building critical college and career readiness knowledge and skills in math. It focuses on key elements of algebra, advanced math, problem-solving and data analysis, and geometry. Over the course of the Math section, you'll answer multiple-choice and student-produced response questions that measure your fluency with, understanding of, and ability to apply the math concepts, skills, and practices that are most essential.

Approximately 30% of math questions are set in context. These in-context "word" questions require you to consider a science, social studies, or real-world scenario and apply your math skills and knowledge, along with an understanding of the context, to determine the answer to each.

Select questions in this section are accompanied by an informational graphic.

Math Section Overview

- 1st module: 20 operational questions and 2 pretest questions
 - 2nd module: 20 operational questions and 2 pretest questions
- Total: 44 questions**
- Time per module:
- 1st module: 35 minutes
 - 2nd module: 35 minutes
- Total: 70 minutes (1.59 minutes per question)**
- Questions from all four content domains appear in each test module. Across each module, questions are arranged from easiest to hardest, allowing you to have the best opportunity to demonstrate what you know and can do. Pretest questions don't count toward your score.

MATH SECTION CONTENT DOMAINS AND QUESTION DISTRIBUTION			
Content Domain	Domain Description	Skill/Knowledge Testing Points	Question Distribution
Algebra	Measures the ability to analyze, fluently solve, and create linear equations and inequalities as well as analyze and fluently solve equations and systems of equations using multiple techniques	Linear equations in 1 variable; Linear equations in 2 variables; Linear functions; Systems of 2 linear equations in 2 variables; Linear inequalities in 1 or 2 variables	13–15 questions
Advanced Math	Measures skills and knowledge central for progression to more advanced math courses, including demonstrating an understanding of absolute value, quadratic, exponential, polynomial, rational, radical, and other nonlinear equations	Equivalent expressions; Nonlinear equations in 1 variable and systems of equations in 2 variables; Nonlinear functions	13–15 questions
Problem-Solving and Data Analysis	Measures the ability to apply quantitative reasoning about ratios, rates, and proportional relationships; understand and apply unit rate; and analyze and interpret 1- and 2-variable data	Ratios, rates, proportional relationships, and units; Percentages; 1-variable data: distributions and measures of center and spread; 2-variable data: models and scatterplots; Probability and conditional probability; Inference from sample statistics and margin of error; Evaluating statistical claims: observational studies and experiments	5–7 questions
Geometry and Trigonometry	Measures the ability to solve problems that focus on area and volume; lines, angles, triangles, and trigonometry; and circles	Area and volume; Lines, angles, and triangles, including right triangles and trigonometry; Circles	5–7 questions

These specifications are for the adaptive version of the digital test, which most students will take. Students approved for certain testing accommodations—such as a human reader, raised line drawings, or paper test forms—will test using a nonadaptive version of the digital SAT. This nonadaptive version has a slightly higher number of test questions in each module to account for the fact that the test is not adaptive. Practice for this nonadaptive version of the test is also available in Bluebook. You can learn more about nonadaptive test specifications in Appendix E of the [Assessment Framework for the Digital SAT Suite](#).

Information You'll Need on Test Day for Digital Testing

Be prepared for digital testing by making sure you bring only what you need for the test. Leave all prohibited items at home. You'll have your testing device, but won't be able to use or access any other personal electronic devices, such as a mobile phone, smart glasses, or other wearable technology, during the test. See the SAT Weekend Testing Rules, available at sat.org/rules, for a full list of items that are not allowed during testing. Review the other important guidelines in this section to make sure you understand the policies that cover your SAT testing experience.

This section also includes information about test day technical support.

Monitor your email and the [Check for Test Center Closings](#) webpage in the days leading up to your test and the day of your test to make sure your test center hasn't changed or closed. You should also see any changes or closures listed on your test card on the Bluebook homepage and in [My SAT](#).

Test Day Items

See the SAT Weekend Testing Rules at sat.org/rules for full requirements for taking the SAT.

The following items are required for taking the SAT:

- A valid photo ID for check-in. See sat.org/id. The ID must be a physical ID.
- Your admission ticket. Show your printed ticket or present it on your mobile device.
- Your College Board username (your email address) and password.
- A fully charged, acceptable testing device with Bluebook already downloaded and exam setup complete.
- A pen or pencil for scratch work.
- Approved wired headphones for students approved for assistive technology; headphones must be non-Bluetooth and incapable of recording.

Though not required, consider bringing:

- Snacks and drinks (which must be under your desk during testing).
- An acceptable calculator for the Math section (if you prefer using a handheld calculator to using the embedded Desmos calculator in Bluebook). Please see [SAT Calculator Policy](#) for more information.
- Extra batteries, a power cord, and backup calculator.
- Backup testing device.

Test Day Steps

This section summarizes important guidelines for digital testing. See the SAT Weekend Testing Rules at sat.org/rules to make sure you cover all the steps to successfully prepare to take the SAT.

- Plan ahead and bring equipment that's in good working order with enough battery power to last for about 3 hours. Your testing device must be able to connect to the test center's Wi-Fi network, and you may need to update your operating system to support the digital test.
- Arrive early if you were approved to borrow a device to complete exam setup and obtain your admission ticket. You must bring confirmation of approval.
- If you're testing with extended time, bring a power cord; your testing site should provide an outlet for recharging if needed.
- Download the Bluebook app onto the device you'll use on test day from bluebook.app.collegeboard.org.

REMINDER: If you're using a loaned device from College Board, arrive 30 minutes early so you have time to complete exam setup and access your admission ticket.

- Between 1 and 5 days before the test, you need to sign in to the app, agree to the *Privacy Policy and Use of This App* rules and complete exam setup. You'll get access to your admission ticket once you've completed exam setup.
- On test day, at the center, you'll follow instructions to connect to the test center's Wi-Fi, complete exam check-in on your testing device, and type a brief statement saying that you agree to follow all rules for the exam.
- Bluebook will tell you when to take your break. Because the test is individually timed, you'll break and finish testing at slightly different times from other students in your room. It's important to maintain a silent testing environment regardless.
 - ◆ Keep your photo ID with you at all times, especially if you leave the testing room. You may be asked to show your ID at any time while in the test center.
- During testing:
 - ◆ You are not allowed to wear a hat or head covering (except when worn for medical or religious reasons; if a hooded garment is worn, the hood must remain down).
 - ◆ Store any snacks or drinks you bring under your desk. You may only eat snacks during breaks. The testing staff will tell you where you can go to have your snack.
 - ◆ You must remain in the testing site for the duration of the test. If you leave before you're dismissed, your scores are subject to cancellation.
 - ◆ Keep your laptop open or your tablet uncovered and on during the entire duration of testing. Closing your laptop lid or covering your device may result in a loss of your responses.

For a complete list of what you can't bring and what isn't allowed during the test, see the SAT Weekend Testing Rules at sat.org/rules.

Support on Test Day

Bluebook is designed for minimal network and device requirements. You need an internet connection to start the test and at the end of testing to submit your answers. If you lose connectivity while you're testing, you can keep going without losing any work.

IMPORTANT: When using Bluebook as intended, with no other programs or applications running, the draw on your device's battery will be fairly low. You're allowed to have a power cord with you, but most students can take the entire test without ever plugging in their devices.

Before, during, and after testing, there is a Help icon in the Bluebook app where users can review troubleshooting tips.

Your test center will provide additional support on test day. They will help ensure the test center Wi-Fi network is working and assist you if you encounter connectivity issues. Additionally, there will be a help room for you to troubleshoot device issues with the testing staff, although most of the time students are able to resolve on their own by restarting the application. If you encounter a technical issue on test day, you won't lose any testing time. We'll also have customer service resources ready to help the test center troubleshoot issues on test day.

REMINDER: The deadline to submit answers, if unsuccessful on test day, is 11:59 p.m. local time the next day. Students using a loaned device should not leave the test center until their answers are submitted.

Digital Testing Recap

- Before arriving at the test center, you'll need to complete exam setup in Bluebook to generate your admission ticket. You will be turned away if you're unprepared.
- Your admission ticket is needed to check in to the test center. Your testing device should be fully charged and able to last the duration of the test and exam setup. You can bring a charger, but we can't guarantee access to an outlet unless you have an accommodation for extended time.
- You'll break and finish testing at slightly different times from other students in your room. Bluebook tells you when to take your break instead of the proctor.
- Test centers have a help room to assist with simple troubleshooting; however, most students are able to solve any issues on their own with a simple app restart.
- If you run into a technical issue, you won't lose testing time. You'll need access to the internet to start the test and submit answers but you can continue testing if the connection is disrupted during the test.
- Student devices are locked during testing and you won't be able to access other applications on your device. Bluebook is the only application you can have open on your device during testing unless approved for external assistive technology.

After the Test

Once you’ve taken the SAT, the next step is to access your scores, understand what they mean, and track your progress. Use the information in this section to help you make the most of your scores. You can also start to explore additional College Board tools to help you plan for the future.

How the SAT Is Scored

The SAT Suite uses a multistage adaptive test design and item response theory (IRT) methodology to precisely measure students’ knowledge and skills with fewer questions in less time. Every test includes a standardized set of question types and measures the same content domains, so all students have the same opportunity to demonstrate their strengths. Your scores depend on several factors, including whether you answer questions right or wrong, the difficulty level of the questions, and the probability that you might be guessing. For most students, it’s better to guess than leave a question blank, especially if you can eliminate one or two wrong answers first. To learn more about how assessments in the SAT Suite adapt to your performance, watch our [What Is Digital SAT Adaptive Testing?](#) video.

TEST SCORING		
SAT Score Reported	Details	Score Range
Section Scores (2)	• Reading and Writing (RW)	• 200–800
	• Math (M)	• 200–800
Total Score	Sum of the 2 section scores	400–1600

Getting Your Scores

Your online scores provide insight into your performance by summarizing how you did on each section. You can access your online scores through your College Board account. If you can’t access your scores online, your school can print a score report PDF for you. Visit sat.org/scores for more information.

Your College Board student account at studentscores.collegeboard.org provides additional insights about your scores and information about BigFuture. Your online score insights include:

- Percentiles that let you see how your results compare with those of other students like you.
- Additional information about knowledge and skills, including how you scored on every content domain on the test, so you can identify your strengths and areas for growth.
- A search tool for careers and college majors, with suggestions based on information you provide in your profile.

Explore Career Options

For students in the U.S., your score report will show Career Insights Snapshot—a list of growing careers in your state that connects you to your math and reading and writing skills based on your SAT Suite performance. Career Insights Snapshot provides career examples, not recommendations, that can stimulate your thinking, broaden your awareness of career options, and encourage deeper career exploration beyond the score report. You can visit bigfuture.org to discover more careers that interest you.

Sending Scores

You'll also have the opportunity when you register for the SAT to choose up to four colleges, universities, or scholarship programs to receive your scores for free. You can designate your score recipients (i) when you register, (ii) anytime before you test, or (iii) within 9 days after you test. For these free score sends, only your scores from the test date on the registration will be sent (or from the makeup test for that registration, if applicable), unless you specifically ask to send more existing SAT scores. (Sending scores to additional colleges, universities, or scholarship programs can be requested online for a fee.) We share the names of the organizations you select for your four free score sends with your school and district.

If you want to change where your scores are sent, you have until 9 days after the test date to alter your four free score reports at no charge. After that, you can't make any changes and you'll need to place a new order. You'll be charged the additional score report request fee for each institution you send scores to, although you can send multiple scores to the same institution for one fee. Score Choice™ lets you choose which scores are sent. Visit sendsatscores.collegeboard.org/login for more information.

The scores you receive and the score reports received by colleges and your high school contain total and section scores. Section scores are converted to a point scale from 200 to 800; these are added together to create a total score between 400 and 1600. (See How the SAT Is Scored on page 18 for more information.) Additional score sends include all your available scores unless you choose otherwise, as explained later in this section.

College Board doesn't use your raw score or your reported scaled score by itself or in combination with any other information to predict your individual future academic performance at specific postsecondary institutions. However, College Board does help individual colleges and universities use and interpret SAT scores.

When you request that we send your scores to the colleges, universities, or scholarship programs you choose, we send your scores, certain demographic information about you, and other information you provide when taking the SAT to those organizations, in accordance with sat.org/scores. These organizations may use this information to send you information about admissions, educational, financial aid, and scholarship opportunities. Being contacted by these organizations does not mean you have been admitted or are eligible for a scholarship or financial aid program. To be considered for admission to a college or university, you must submit an application and complete all required steps. Likewise, you must complete any requirements set by scholarship programs to be considered for their opportunities.

In certain college and university systems, once you submit your score to one school, other schools within that system will also have access to your score. Please note, however, that if you are applying to more than one school within a college or university system, it is still important for you to send your SAT scores to each individual school. If you are not sure whether the specific school you are applying to is part of such a system, contact the school's admissions office.

Score Reporting

Your score and other information about you will be sent to your high school, district, state department of education, certain federal and state scholarship programs, state direct admissions programs, and to the organizations you choose, as described under Sending Scores on page 19 and in accordance with our Privacy Policy in the SAT Weekend Testing Rules.

- Each time you take the SAT, your scores are added to your College Board record. All of your scores are reported to your high school.
- You can send scores to additional colleges and scholarship programs online for a fee. They'll be sent to your designated colleges and scholarship programs 5–10 business days after the request is received. Once you place an order to send scores, the order cannot be canceled. Visit sendsatscores.collegeboard.org/login for more information.
- If your score is canceled, no score reports for that test date will be sent.
- If you take a makeup test, the score report(s) will include the score from the makeup test.

For additional information regarding the College Board score cancellation policy or about voluntarily canceling your scores, see the SAT Weekend Testing Rules at sat.org/rules.

Score Choice

If you take the SAT more than once, you can have the option to use Score Choice, if you choose to send scores online for a fee. With Score Choice, you can choose which scores you send to colleges. Choose by test date for the SAT—but keep in mind that some colleges and scholarship programs require you to send all your scores.

This online service is optional and only applies to scores already received. It is not applicable to any of your four free score sends you may select; those scores are automatically included in those score reports. If you don't use Score Choice, we'll send all your SAT scores from your most recent six administrations. However, if you want only your highest scores to be seen from already released scores, select Score Choice. Each school or program has its own deadlines and policies for how scores are used. Information is listed on the score-sending site for each participating organization, but check with the individual school or scholarship program to make sure you're following its guidelines. We're not responsible for the accuracy of this information or the consequences of your decisions.

Keeping Scores on File

Your test scores and related personal information that you provide to College Board become part of your student record and are retained in accordance with our [Privacy Statement](#). For requests to have a permanent College Board student record removed, individuals must call College Board customer service, write to College Board, (Attention: Customer Service), or email DataProtectionInquiry@collegeboard.org. See the inside front cover of this guide for contact information.

Canceling Your Scores

If you feel you didn't do your best on the SAT Weekend, you can cancel your score no later than 11:59 p.m. Eastern Time, one week after your test date. For easy instructions on how to cancel a score through your My SAT account, go to satsuite.collegeboard.org/scores/canceling-sat-scores/sat-weekend.

For additional information regarding the College Board score cancellation policy or about voluntarily canceling your scores, see the SAT Weekend Testing Rules at sat.org/rules.

REMINDER: After you submit a request to cancel scores, the score cannot be reinstated or reported to you or any institutions.

SAT Weekend Testing Rules

IMPORTANT NOTE REGARDING THE TESTING RULES

You must review and agree to the SAT Weekend Testing Rules when registering for the test and again in Bluebook before the test. Please read these rules carefully in advance at sat.org/rules.
